

xFitter Examples & Applications

Case Study: The Strange Case of the Strange PDF

... can we solve it???

Peter Risse & Fred Olness
SMU

*Thanks for substantial input
from my friends & colleagues*

Strange PDF: νN di-muon Production

2

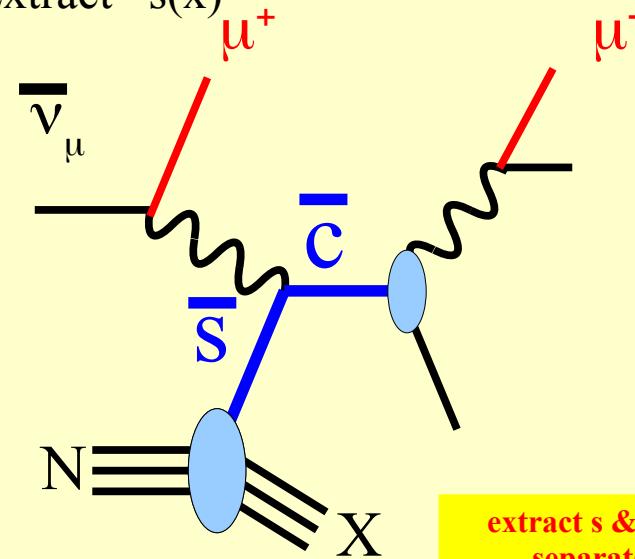

Need to “dig out”
 $s(x)$ underneath $d(x)$

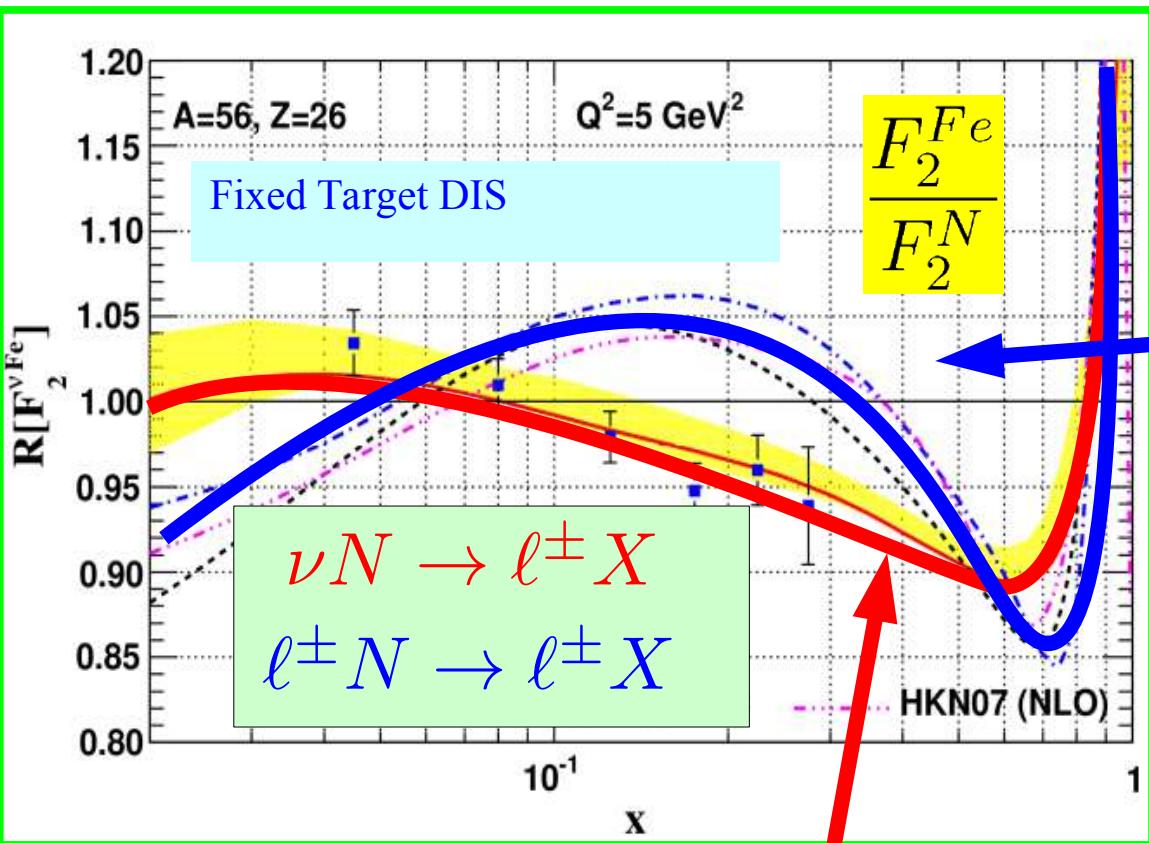

Extract $s(x)$

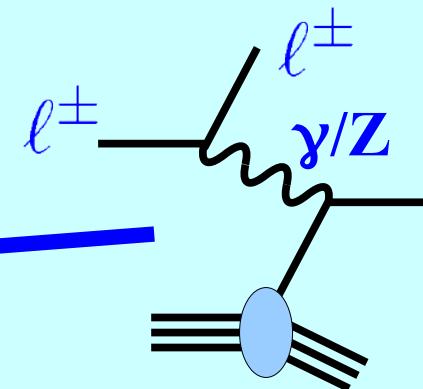

Extract $\bar{s}(x)$

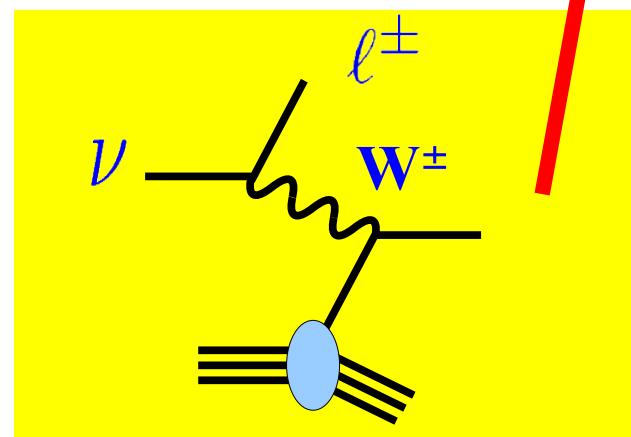

extract s & s -bar
separately

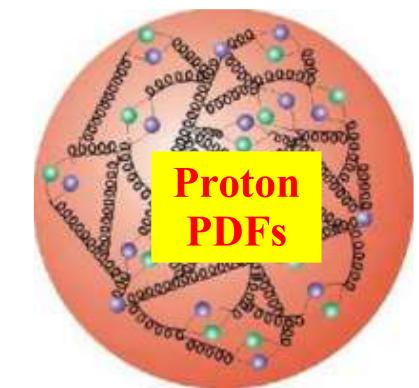

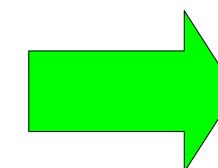

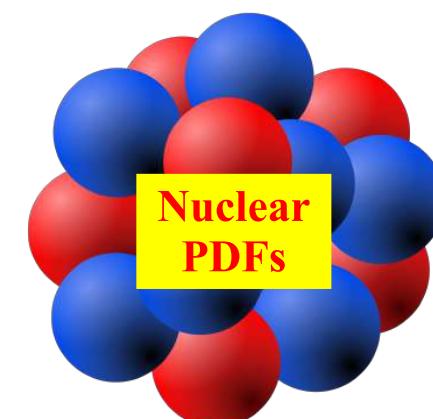

Charged Lepton DIS

*some caveats
... correlated errors*

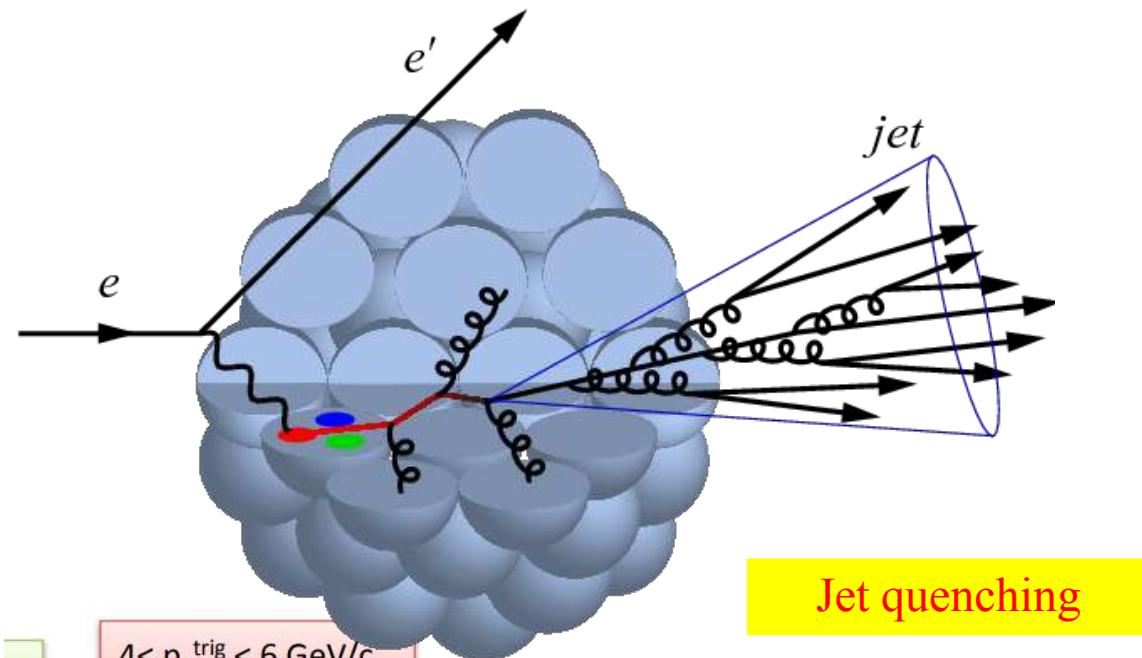

Neutrino DIS

Propagation of γ/W thru nuclei

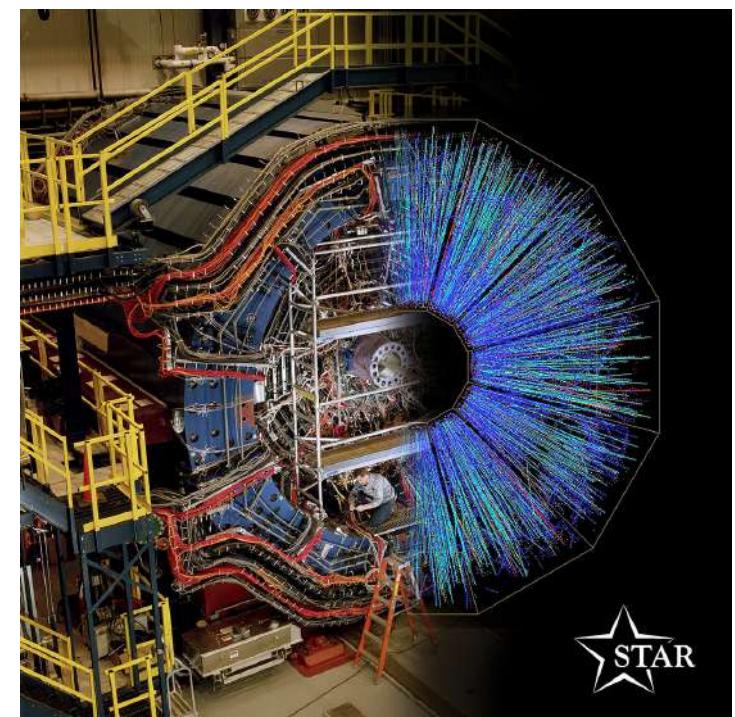

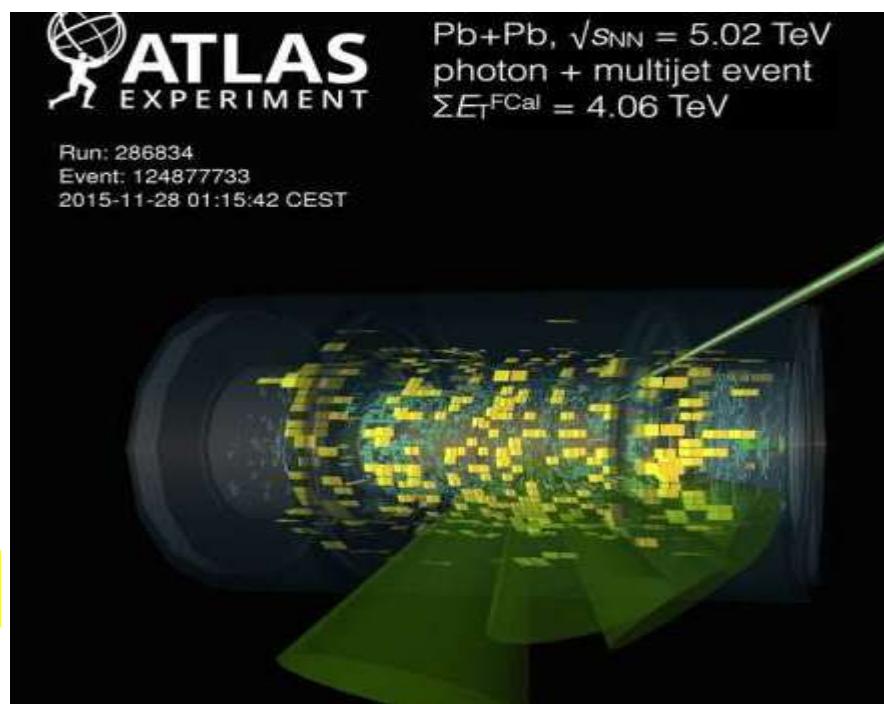

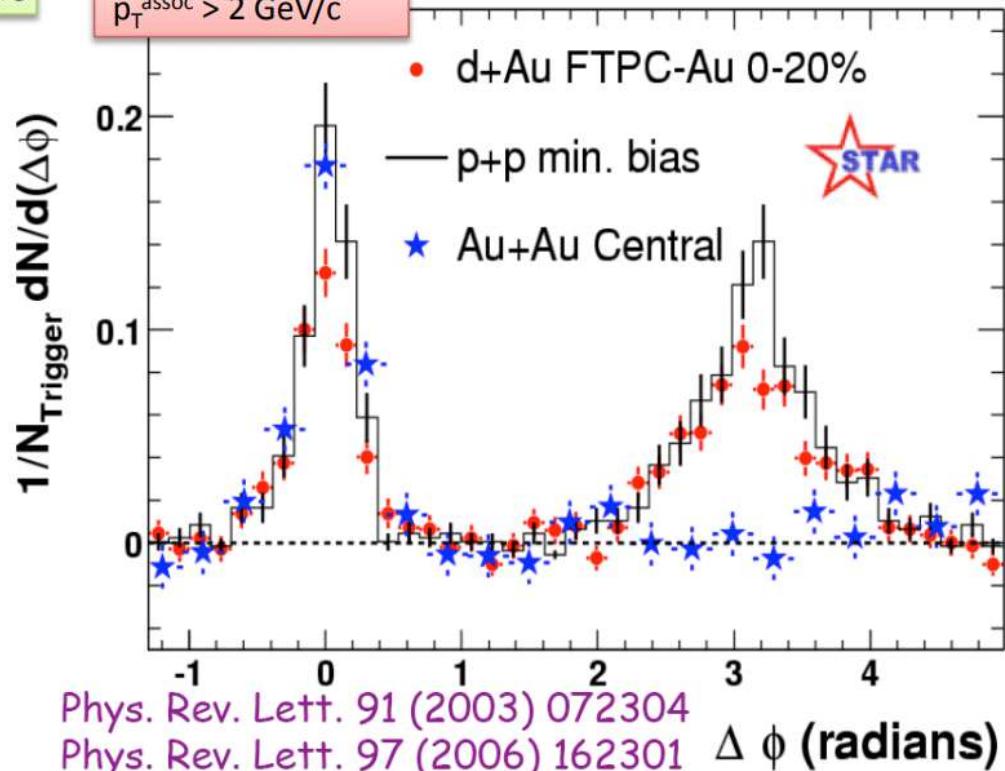

Depends on nuclear corrections

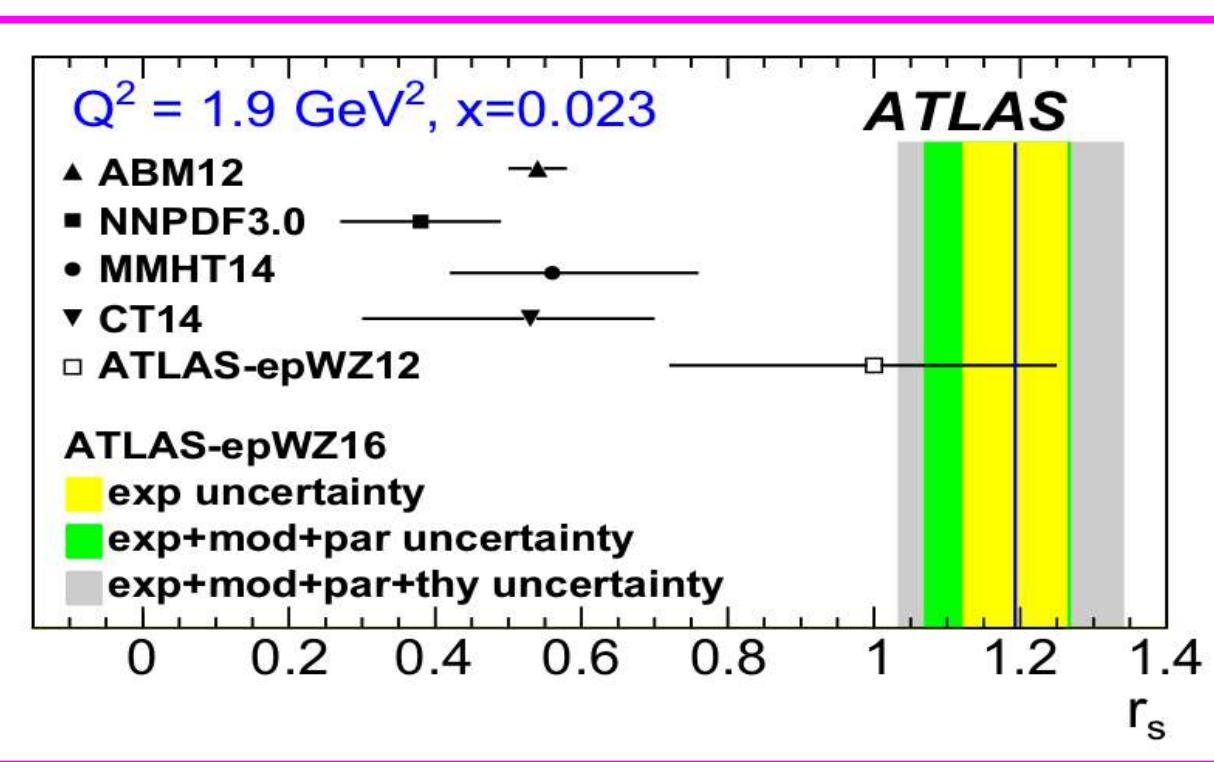

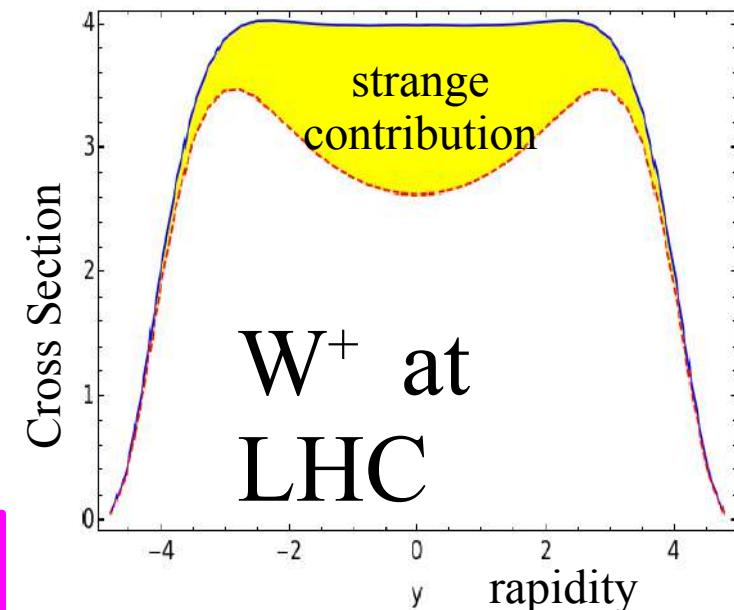

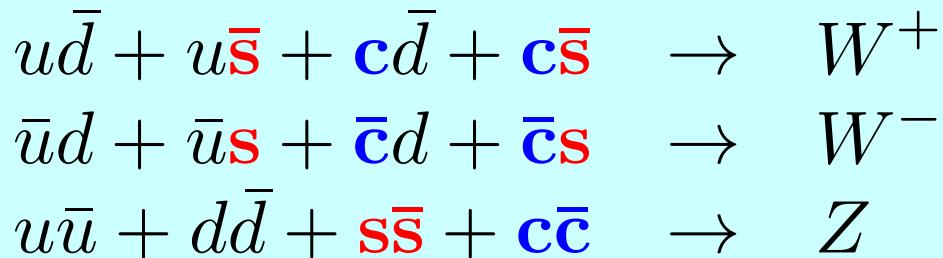

Propagation of γ/W thru nuclei

le

$4 < p_T^{\text{trig}} < 6 \text{ GeV}/c$
 $p_T^{\text{assoc}} > 2 \text{ GeV}/c$

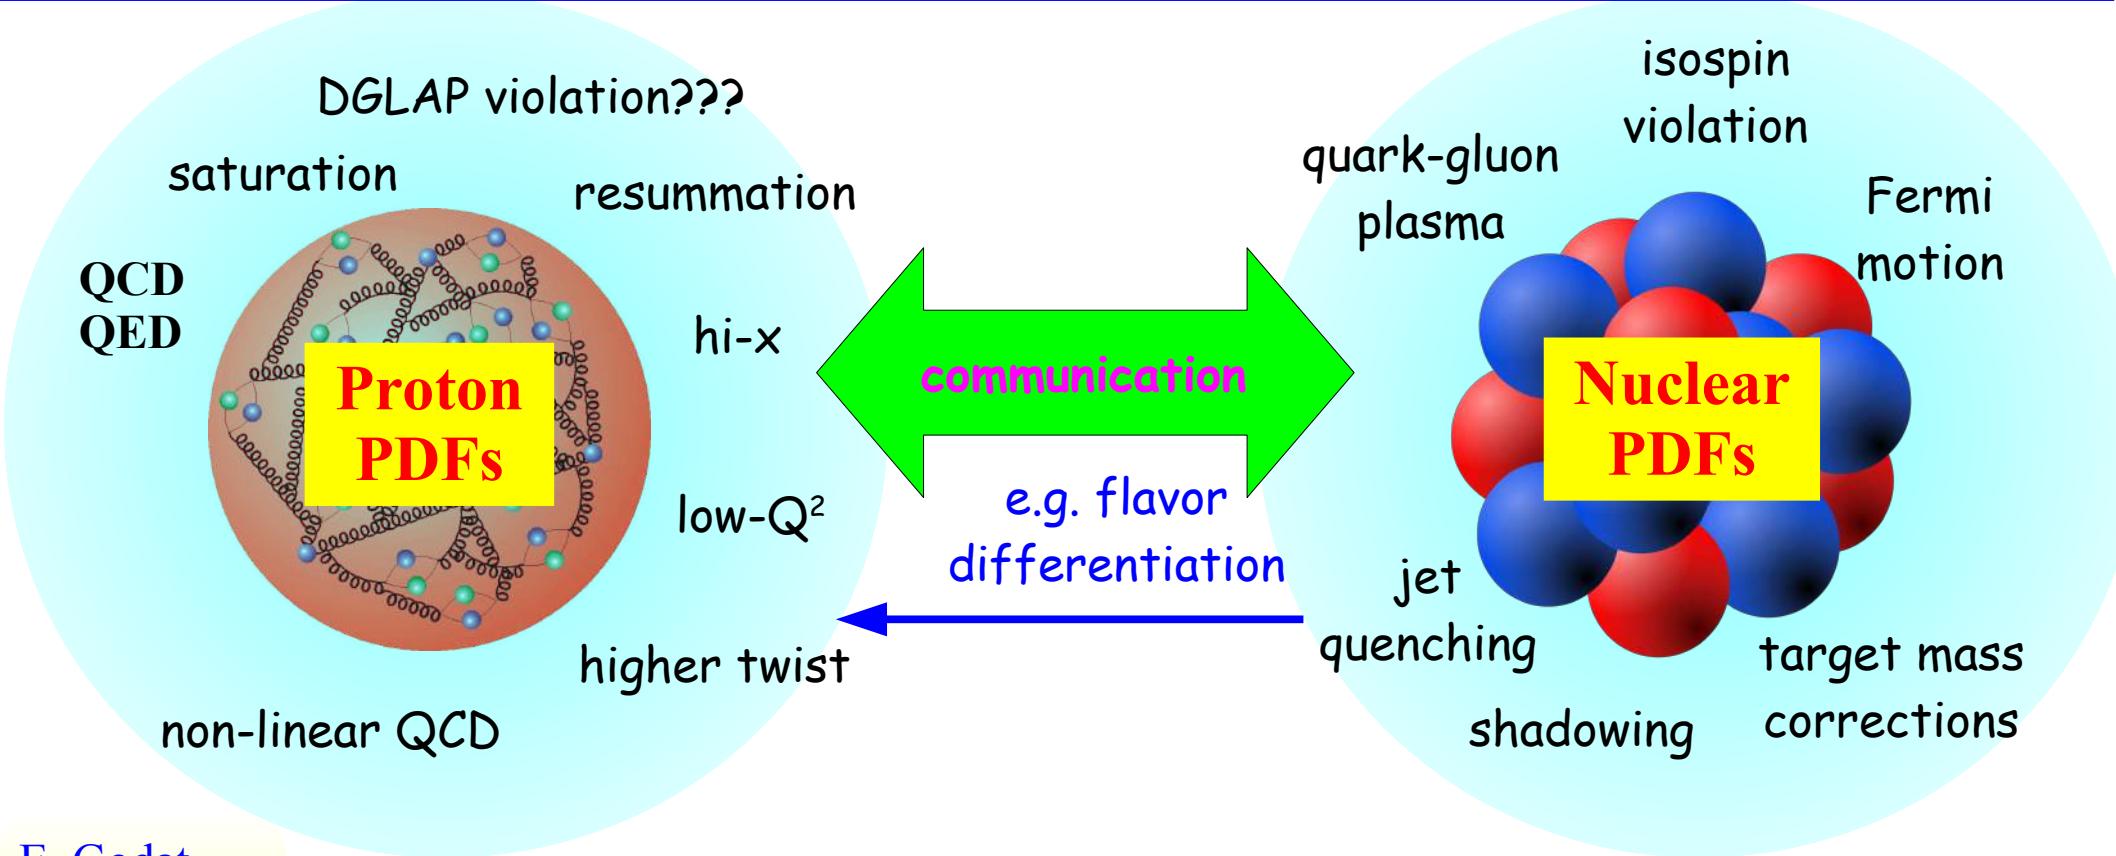

$$r^s = \frac{\bar{s} + s}{2\bar{d}}$$

Do it yourself!!!
